

**Elementary School Academic Program Outline:**

It's crucial to build core learning skills that will serve your child later in middle and high school. Our teachers make every program unique, interactive, and most of all, fun, to kickstart your child's learning journey.

Strong reading and writing skills are essential to learning. Our tutors will inspire your child to fall in love with reading and gain confidence in writing using Children Come Click's time-tested 3-step process. Your child will flex their budding critical thinking skills by exploring novels, articles, and short stories.

Your child's quantitative skills are equally as important as their qualitative skills. In Math, our tutors help your child from the very basics of number sense and arithmetic all the way to fractions, decimals, and measurement conversion.
